

ANGGA KERSANA MUNGgaran

Product Engineer / Technical Product Manager · spec-to-ship owner · 7+ years in HR technology

Cimahi, West Java, Indonesia · +62 813-2423-0307 · anggakersana@gmail.com · portfolio: anggakersana-dev.vercel.app · linkedin.com/in/angga-munggaran · github.com/anggakersanamunggaran

PROFILE

Product person who also ships the code, with 7+ years inside a B2B SaaS that recruiters and job applicants used every day. At ASTRNT I defined the product and delivered it: I authored **19 product requirement documents and 30 design use cases**, built the template the team writes against, and owned the candidate experience end to end, from interviews to assessments. I planned the work through **1,661 Jira tickets** and delivered a flagship modernisation without stopping the business for customers. I can sit with a founder to shape an idea, and with an engineer to make sure it ships. Now open to **senior product-management and product-engineering roles**.

PROFESSIONAL EXPERIENCE

Senior Full-Stack Engineer, Product & Platform (product definition + delivery) May 2019 - Aug 2026
ASTRNT (astrnt.co) · HR-technology company. Video-interview and online-assessment platform for hiring

Full-time · planned and delivered 1,661 Jira tickets (93% completed); roughly 11,700 commits across 35 repositories.

- **Defined and shipped a flagship modernisation without stopping the business.** Authored the product-specification layer for the ASTRNT 2.0 dashboard rebuild (19 PRDs, 30 design use cases and the company-wide PRD template), then delivered 18 feature areas in about six months while the legacy product stayed live for customers.
- **Owned the candidate-facing product experience end to end.** From brief to shipped feature on the QnA candidate app: interview sessions, five question formats, self-paced mode, proctoring and anti-cheat, and retake flows, all localised across EN / ID / PT-BR. I led the UX decisions and merged the work teammates built on shared branches.
- **Turned requirements into scope a team could execute.** Broke the rebuild into feature areas with explicit parity tracking against V1, so product completeness was measurable and nothing a customer relied on was silently dropped.
- **Made product decisions measurable and safe.** Chose a dual-database migration so the modernisation carried no cut-over outage, prioritised by business risk, and gated releases with automated E2E checks instead of hope.
- **Productised one codebase into three commercial products.** Kognisi.id (certified course marketplace), Popskul (fresh-graduate job board) and CDC (university career portals), each with its own branding, payments and funnel.
- **Delivered client-facing product under real brand expectations.** Landing and onboarding flows for named enterprises including BCA (with 18 university sub-sites), Google, Deloitte, Gojek, Sephora and Home Credit.
- **Brought AI into the product users could feel.** Defined and shipped AI-assisted CV scoring, candidate-to-job matching and video-answer grading using Anthropic, OpenAI and Gemini SDKs, plus a psychometric (VRA) assessment.
- **Protected the product during a platform migration.** Helped carry the stack from AWS to Azure across the public site, candidate app and recruiter backend with no customer-facing downtime.

EduDok, Telkom Incubator · Fullstack Programmer Sep 2018 - Feb 2019
• **Helped steer a product pivot from B2C to B2B**, rebuilding the landing page and core architecture around enterprise clinic clients after talking with them about what they actually needed.

RECOGNITION

“Set Objective, Move Fast” Award (ASTRNT, Q3 2025). For delivering significant results that represent the company value.
“We Do Excellence & Personal Growth” Award (ASTRNT, 2026). For outstanding personal and professional excellence.
Published paper and speaker (SNATI 2017): MFCC and Hidden Markov Model voice recognition.

EDUCATION

S.Kom., Informatics **Universitas Jenderal Ahmad Yani (UNJANI), Cimahi** · graduated August 2017. Concentration: AI and Data Mining.
