

ANGGA KERSANA MUNGgaran

Senior Frontend Engineer · TypeScript / JavaScript · React, Next.js, Redux · complex, scalable UIs

Cimahi, West Java, Indonesia · +62 813-2423-0307 · anggakersana@gmail.com · portfolio: anggakersana-dev.vercel.app · linkedin.com/in/angga-munggaran · github.com/anggakersanamunggaran

PROFILE

Senior frontend engineer, 7+ years building web interfaces people use under real pressure. At ASTRNT I owned the candidate-facing React experience: async video interviews over WebRTC, resumable upload and device testing, then led the ground-up rebuild of the recruiter dashboard on **Next.js 16, React 19 and TypeScript**, cutting the bundle about 92%. I work in CSS at scale: responsive layouts, cross-browser on Safari, Firefox and Edge. Now open to **senior frontend roles**.

PROFESSIONAL EXPERIENCE

Full-Stack Engineer (frontend-led: React / Next.js / TypeScript)

Apr 2019 - Aug 2026

ASTRNT (astrnt.co) · HR-technology company. Asynchronous video-interview and online-assessment platform for hiring

Full-time · principal contributor: roughly 11,700 commits, 35 repositories, 1,661 Jira tickets held (93% completed).

- **Led the ground-up dashboard rebuild on Next.js 16, React 19 and TypeScript.** Rebuilt the recruiter dashboard that had run on Laravel and React for seven years, shipping 18 feature areas in about six months: onboarding, a bulk-import wizard, credits and billing, an assessment builder, review and reporting, and AI scoring views, styled with Tailwind CSS and shadcn/ui.
- **Built the candidate interview experience people actually sit.** Async video interviews with a resumable, quality-checked upload pipeline, camera and microphone device testing, camera-based proctoring and screen recording, all hardened across Safari, Firefox, Edge and weak connections.
- **Owned five question engines and their flows and validation.** Multiple choice (single and multiple), free text, rating scale, recorded video answers, media and document upload, plus a self-paced mode and one consistent session and timer experience across every format.
- **Cut the front-end bundle by about 92%.** Code splitting plus a dependency audit made the app load faster, alongside async Excel exports and WYSIWYG assessment and email builders so recruiters could create content without engineering help.
- **Kept a legacy React/Redux codebase alive and consistent with the modern one.** Maintained and extended a large Redux application from 2019 to 2026 while the Next.js rebuild ran in parallel, so the product family shipped continuously during migration.
- **Shipped white-labelled, per-client interfaces under real brand expectations.** Built Kognisi.id (certified course marketplace), Popskul (jobs board) and CDC (university career portals) from one Vue/Nuxt codebase, plus enterprise landing pages for BCA (18 university sub-sites), Google, Deloitte, Gojek and Sephora, and localised the product across EN / ID / PT-BR.
- **Enforced front-end quality with automated checks.** Established a no-mock E2E policy with Cypress and code-review gates on the rebuild, and added real-time video-quality checks that tell a candidate to retake instead of silently submitting unusable footage.
- **Built the release pipeline the front ends shipped through.** Twin build-aws / build-azure pipelines per app on Azure DevOps so each environment switched at build time, git remotes and CI moved onto Azure DevOps with a beta line running alongside production, and PM2 process management across the product family's servers.

Full-Stack Developer (Freelance)

Aug 2019 - Dec 2019

langgan.id · SaaS website-builder platform with a visual editor

- **Built the React editor and its Laravel backend** (user management, billing, APIs), letting non-technical users create and manage their own sites without engineering help.

Fullstack Programmer

Sep 2018 - Apr 2019

PT. Rumah Sakit Padjadjaran, "Edudok" (Telkom Incubator)

- **Built healthcare platform modules in AngularJS against a Lumen PHP API** serving 6 clinic clients, applying OOP and SOLID during refactoring to reduce technical debt across all of them.

Earlier (2016 - 2018) · Galamedia Perkasa (news-portal frontend, HR system) · Wahana Saabiq (Ionic mobile 2016 - 2018 app) · Cihanjuang Inti Teknik (Laravel MRP)

AWARDS & ACHIEVEMENTS

ASTRNT awards (2025 & 2026): "Set Objective, Move Fast" and "We Do Excellence & Personal Growth", both for delivering significant results and outstanding personal excellence.

EDUCATION

S.Kom., Informatics Universitas Jenderal Achmad Yani (UNJANI), Cimahi · graduated August 2017.

TECHNICAL SKILLS

Frontend & CSS: TypeScript · JavaScript (ES6+) · React (16 to 19) · Next.js 16 · Redux · AngularJS / Ionic · Vue 2 / Nuxt 2 · Tailwind CSS · Sass · shadcn/ui · Webpack

Media & realtime: Web Media APIs · WebRTC · Socket.IO · resumable upload · offline / weak-network resilience

Testing & quality: Cypress E2E · no-mock E2E policy · accessibility-aware markup · performance budgets

Delivery & cloud: Azure DevOps pipelines (CI/CD) · per-environment builds · Docker · PM2 · Azure Blob / AWS S3

Practice & process: OOP · SOLID · design patterns · code review · Agile delivery (Jira, Confluence) · product specification (19 PRDs, 30 design use cases) · PHP / Python / SQL · Git
